Vibrastop™

Vibration-Dampening Gloves

#S10VIB

These gloves are padded with a layer of vibration dampening polymer. Specially compounded, formed-chloroprene coated, seamless-lined gloves. Good for protection from repetitive impact and work with pneumatic vibrating tools. Ergonomic design offers both comfort and flexibility. Meets the EN ISO/ANSI standard for vibration reduction.

Repetitive trauma associated with excessive vibration to the hands is a big problem in North America. Employees develop many symptoms associated with hand-arm vibration syndrome (HAVS). Hand-arm is vibration transmitted into your hands and arms when you use hand-held powered work equipment. Too much exposure to hand-arm vibration can cause hand-arm vibration syndrome (HAVS) and carpal tunnel syndrome use the proper PPE to avoid this!

TESTIMONIAL

Health and Safety Engineering
Specialist

5 STARS - "These gloves do a fantastic job at reducing vibrations. I've used them twice now with my backpack leaf blower and the numbness or tingling I'd get after an hour long session is all but gone."

FEATURES

- Meets anti-vibration standard EN ISO 10819: 1996 and ANSI S3.40
- Black nylon, 7-gauge shell for durable
- Machine washable & rot resistant
- Elastic wrist for a snug fit

APPLICATIONS

Automotive
Forestry and Landscaping
Construction
